

# Keeping yourself safe from cyber attacks

## How many of these cyber safety tips do you use?

Use a password manager

Think of this as a vault for all your passwords.

\*\*\*\*\*

Turn on 2FA

Two factor authentication adds another layer of protection to your accounts.

\*\*\*\*\*

Update your devices

Up-to-date operating systems and apps defend against bugs and viruses.

Check your privacy settings

Get to know your privacy settings and control who can see what on your accounts.
